2. HTML — Elements and attributes

Index: HTML tutorial
Previous: Overview and basic tags
Next: Formatting and phrase tags

HTML tag vs element

An element is a start tag, the content, and an end tag. The end tag repeats the name with a slash.

Start tag	Content	End tag
`<p>`	This is paragraph content.	`</p>`
`<h1>`	This is heading content.	`</h1>`
`<div>`	This is division content.	`</div>`
` `		

`<p>...</p>` is one element. `<h1>...</h1>` is another. Empty elements such as `<br>`, `<hr>`, `<meta>`, and `<img>` have no end tag.

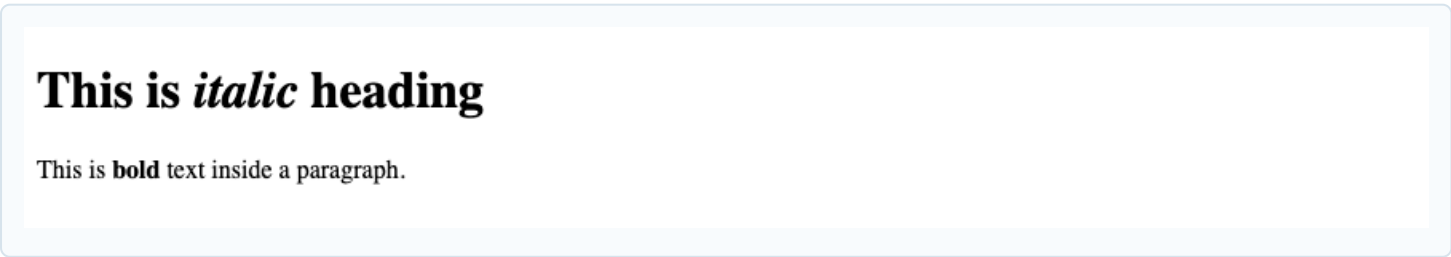

Nested elements

An element can contain another element. The inner element ends before the outer element ends.

Example

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Nested Elements Example</title>
</head>
<body>
  <h1>This is <i>italic</i> heading</h1>
  <p>This is <b>bold</b> text inside a paragraph.</p>
</body>
</html>
```

This will produce the following result:

Attributes

An attribute adds information to the start tag. The name, then `=`, then the value in quotes.

These attributes can be used on any element:

Attribute	Purpose
`id`	A unique name for this element on the page
`class`	A group name. Several elements may share one class
`title`	Advisory text, often shown when the pointer rests on the element
`style`	Presentation rules for this element
`lang`	Language of this element's text
`dir`	`ltr` or `rtl`, the writing direction
`hidden`	The element is in the file and is not shown
`translate`	`yes` or `no`
`tabindex`	Position in the keyboard tab order
`data-*`	A custom data value, for example `data-sku="104"`

Example

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Attributes Example</title>
</head>
<body>
  <h1 id="top" class="title">Document heading</h1>
  <p title="Advisory text" style="color: #1a5f4a">This paragraph carries a title and a style.</p>
  <p lang="te">ఇడ్లీ మరియు దోశ అందుబాటులో ఉన్నాయి.</p>
  <p dir="rtl" lang="ar">هذه فقرة قصيرة.</p>
  <p hidden>This paragraph is not shown.</p>
  <p data-sku="104">Item 104</p>
</body>
</html>
```

This will produce the following result:
