Capstone One-Pager — CampusCart (Java)

MVP checklist for CampusCart (learners).

Title

CampusCart — College E-Commerce & Booking Portal

CampusCart is the college storefront; it uses the same catalog / cart / order patterns as **Swiggy**. Batch alts: MediBook Clinic → **Apollo Hospitals**, teller portal → **HDFC Bank**.

Stack

Spring Boot 3.x · MySQL · REST (JSON) · HTML/CSS/JS · GitHub · (stretch) React storefront · (optional) Thymeleaf overview pages

MVP features

1. Register / login / logout (JWT lite or session — junior-realistic)
2. Catalog list + detail + search
3. Cart + place order
4. Order history
5. Admin catalog & order management
6. Validation on write APIs (and UI where present)
7. Deployed demo + README

Schema (text ER)

```
Category 1—∗ Product
User 1—∗ Order 1—∗ OrderItem ∗—1 Product
```

UI / API surfaces

REST (must): products, cart, orders, auth
Pages: Home · Product detail · Cart/Checkout · Orders · Login/Register · Admin/Staff
Stretch: React listing consuming the same API · short Thymeleaf catalog

GitHub milestones

M0 Repo + Maven + README → M1 Auth shell → M2 JPA catalog → M3 Orders → M4 Deploy → M5 React (opt) → M6 Defense

Defense (10 min)

Problem → Demo → Schema → Hardest bug → Next feature
