# 05 — Database MySQL (bridge)

| File | Focus | Calendar |
| --- | --- | --- |
| 01_MySQL_for_Full_Stack_Developers.md | FS bridge: ER, DDL/DML/DQL/TCL, JOINs; required `MYSQL/` labs | S46–S54 |

SQL is **not** rewritten here. Teach from `MYSQL/README.md` using the required-labs table in the bridge module.

**Authored:** MySQL bridge (`01`). Backend layer is Python. Next hop is the Python ↔ MySQL bridge (S55). MySQL seed labs stay in `MYSQL/labs/`. No Django code this week.
