KEY — Biweekly Assessment BW05 — Weeks 9–10 (Trainer only)

Do not share with students. Excluded from student pack (`*_KEY.md`).

A. MCQ answers

1. **b** — Auto-close the file
2. **d** — csv.DictReader
3. **c** — DEBUG/INFO/WARNING/ERROR
4. **b** — Stages then records a snapshot
5. **b** — Remote (e.g. GitHub)
6. **a** — A row
7. **c** — Filter rows that match a condition
8. **c** — SQL injection
9. **b** — Exception
10. **a** — Explain how to run the project
11. **a** — Usually always after try
12. **c** — A column to another table's key

B. Coding — model points

1. Write `add_expense(title, amount, category)` that raises `ValueError` if amount ≤ 0, else appends to a list of simple objects/dicts. Then sketch `export_csv(path)` using `csv.DictWriter`.
   - Award marks for correctness + teaching-order constraints respected.
2. Write a safe age reader: convert input to int; if out of 1–120 raise a custom `InvalidAgeError`. Show try/except in a tiny demo loop.
   - Award marks for correctness + teaching-order constraints respected.

C. Short answer — model

History of working states; easy rollback; portfolio proof; collaboration habit for jobs. Rejected push: `git pull` (resolve conflicts if any), then `git push`. Do not force-push shared `main`.

Suggested scoring

Section	Marks
A MCQ (1 each)	12
B Coding (6 each)	12
C Short	6
Total	**30**
