JPA and REST — taught in Spring Boot

One home: Spring Data JPA, validation, REST, DTOs, and Postman live under `../09_Spring_Boot/`.

Topic	File
REST controllers, JSON, Thymeleaf overview	02_Spring_Web_REST.md
JPA + validation	03_Spring_Data_JPA_Validation.md
DTOs + Postman	04_REST_DTOs_Postman.md

Do **not** duplicate those notes here. JDBC (SQL from Java, before JPA) is `../07_JDBC/01_JDBC_CRUD.md`.
