06 — Database MySQL (bridge)

File	Focus	Calendar
01_MySQL_for_Full_Stack_Developers.md	FS bridge: ER, DDL/DML/DQL/TCL, JOINs; required `MYSQL/` labs	S46–S54

SQL is **not** rewritten here. Teach from `MYSQL/README.md` using the required-labs table in the bridge module.

Authored: MySQL bridge (`01`). Same shape as the Python FS MySQL bridge; backend layer is Java. Next hop is JDBC `PreparedStatement` (S55, next module). No Java lab kit this week (kit 16 is JDBC). MySQL seed labs stay in `MYSQL/labs/`. No Spring Boot code. No Lombok.
