Ticket: Refactor ATM Into Functions

Customer: Tech lead
Need: Same ATM behaviour, but logic in functions (no giant `main`).

Starter

Fill `deposit`, `withdraw`, `show_menu` in starter.

Broken

Scope / mutable default bugs in broken.

Done when

- [ ] Deposit / withdraw logic lives in functions (not a giant `main`)
- [ ] Bad amount or overdraft prints a message and leaves balance unchanged
- [ ] Menu repeats until Quit
