# 06 — Database MySQL (bridge)

| File | Focus | Calendar |
|---|---|---|
| 01_MySQL_for_Full_Stack_Developers.md | FS bridge: ER, DDL/DML/DQL/TCL, JOINs; required `MYSQL/` labs | S46–S54 |

SQL is **not** rewritten here. Teach from `MYSQL/README.md` using the required-labs table in the bridge module.

**Authored:** MySQL bridge (`01`). Same shape as the Python FS MySQL bridge; backend layer is Java. Next hop is JDBC `PreparedStatement` (S55, next module). No Java lab kit this week (kit 16 is JDBC). MySQL seed labs stay in `MYSQL/labs/`. No Spring Boot code. No Lombok.
