KEY — Biweekly Assessment BW03 — Weeks 5–6 (Trainer only)

Do not share with students. Excluded from student pack (`*_KEY.md`).

A. MCQ answers

1. **b** — Immutable
2. **a** — Unique elements
3. **d** — Order-preserving unique keys
4. **c** — Keys
5. **b** — None (default)
6. **a** — LIFO
7. **d** — Last item
8. **c** — def
9. **b** — None
10. **a** — Parameter in def; argument in call
11. **b** — dict
12. **b** — `[80, 90]`

B. Coding — model points

1. Build a contact-book **menu** with a dict (add / lookup / delete / list / quit). Missing lookup must not crash. Script style or simple functions OK.
   - Award marks for correctness + teaching-order constraints respected.
2. Write `def deposit(balance, amount)` and `def withdraw(balance, amount)` that print a message and return unchanged balance on bad amount/overdraft; otherwise return new balance.
   - Award marks for correctness + teaching-order constraints respected.

C. Short answer — model

Reuse (call deposit many times); clearer testing/debugging; fix once vs many copy-paste places.

Suggested scoring

Section	Marks
A MCQ (1 each)	12
B Coding (6 each)	12
C Short	6
Total	**30**
