Ticket: Marks Entry Keeps Crashing

Customer: Class teacher
Bug: App crashes on `78.5` because it uses `Integer.parseInt`, and average print hides decimals.

Teaching-order: Linear `main` only — no `if` / loops / extra methods.

Broken

Fix bugs in `broken/MarksEntry.java`.

Starter

`starter/MarksEntry.java` — wire `Double.parseDouble` and `printf`.

Done when

- [ ] Uses `Double.parseDouble` for each mark (accepts `78` and `78.5`)
- [ ] Average printed with 2 decimals
- [ ] No `(int) avg` truncation for display

Stretch (after Flow Control): blank/letters → message + re-ask with `while`.
