Ticket: Private tasks per user

Bug report: Any logged-in user can see everyone's tasks.
Accept: Each user sees only their own tasks; anonymous users redirected to login.

Starter

Open `starter/views_snippet.py` — implement `task_list` / `task_create` (or paste into your Django app from Lab `06` / module `04`).

Broken

`broken/views_snippet.py` — typical owner bug. Fix it.

Done when

- [ ] `@login_required` on list/create
- [ ] List filtered by `owner=request.user`
- [ ] Create sets `owner` before save
