Ticket: Product JSON API for mobile

Request: GET/POST `/api/products/` returning JSON. Negative price must 400.

Use module `09_APIs_REST/01_…` Steps 3–5.

Starter

`starter/serializers_snippet.py` — finish `validate_price`.

Broken

`broken/serializers_snippet.py` — missing validation.

Seed

`seed/products.json` — import via admin or loaddata once serializer works.
