05 — Database MySQL (bridge)

File	Focus	Calendar
01_MySQL_for_Full_Stack_Developers.md	FS bridge: ER, DDL/DML/DQL/TCL, JOINs; required `MYSQL/` labs	S46–S54

SQL is **not** rewritten here. Teach from `MYSQL/README.md` using the required-labs table in the bridge module.

Authored: MySQL bridge (`01`). Backend layer is Python. Next hop is the Python ↔ MySQL bridge (S55). MySQL seed labs stay in `MYSQL/labs/`. No Django code this week.
